

Water Act 2000 – Form W2F083

ABN 51 242 471 577

Notification form for accepted development works to take overland flow water for an environmentally relevant activity

Purpose of the form

This form is used to notify the department of works constructed to take overland flow water that meet the requirements for accepted development.

It should be used by the holder of an environmental authority or a development permit for an environmentally relevant activity to notify the department of works that are constructed to take overland flow water that may be contaminated as a result of operations carried out under the relevant authorisation.

Notification of works must be received within 60 business days of completing construction of the works.

Part A Client details

Specify the full name(s) of all authorisation holders:

If the authorisation holder is a corporation, please supply the ACN:

Attention (Optional) (e.g. Principal, Secretary, Managing Director, etc.)

Street address:

Mailing address (if same as street address write 'as above'):

Main contact for this notification

The contact details provided will be used by the department for the purpose of communications under the *Water Act 2000*. The department may be required or authorised by legislation to disclose your information to other third parties.

Full name:

Part B Details of approvals for the environmentally relevant activity (ERA)*			
*Under the <i>Environmental Protection Act 1994</i> and the Planning Regulation 2017.			
Development permit or environmental authority number			
Date of approval			
ERAs approved - ERA number and short title			
Part C Description of land			
Lot on plan numbers, mining tenement, petroleum authority, or greenhouse gas storage (GGS) activity details of the land on which the works are located. In addition, provide the relevant water plan or catchment area.			
Lot on plan, mining tenement or petroleum authority, or GGS details			
Water plan area, catchment or basin name in which the works are located			
Part D Details of works constructed (non-mining ERAs)			
Works no. or ID	Purpose of works	Capacity of works (ML)	Construction date
Part E Location of works on the property			
Attach a property map showing the location of the works. Include property boundaries, lot on plan descriptions, existing water facilities, the location of the dam or storage, pump or other works, features such as channels, drains and levees that direct water from an overland flow path into a dam or storage, watercourses, and any works to take overland flow water already located on the property.			
Part F Details of proposed works (mining or petroleum)			
Works no. or ID	Purpose of works	Capacity of works (ML)	Estimated construction date

Part G Layout of proposed works (mining or petroleum)

Attach a plan showing works proposed for the next year that includes:

1. a North point
2. the location of all overland flow works including overland flow works constructed under the code
3. specific identification or numbering of overland flow works to be constructed under this code
4. features, such as channels, drains and levees that direct water from an overland flow path into storages
5. mining tenement, petroleum authority boundaries, or greenhouse gas storage
6. watercourses and overland flow paths.

This plan should only reflect the actual linkages that exist between various infrastructure components.

Part H Details of works constructed in the last year (mining or petroleum)

Works no. or ID	Purpose of works	Capacity of works (ML)	Construction date

Part I Layout of works constructed in the last year (mining or petroleum)

Attach a plan showing works constructed in the last year that includes:

1. a North point
2. the location of all overland flow works including overland flow works constructed under the code
3. specific identification or numbering of overland flow works to be constructed under this code
4. features, such as channels, drains and levees that direct water from an overland flow path into storages
5. mining tenement, petroleum authority boundaries, or greenhouse gas storage
6. watercourses and overland flow paths.

This plan should only reflect the actual linkages that exist between various infrastructure components.

Part J Declaration**All authorisation holders to complete and sign the declaration below.**

If more signature space is required, copy or print a blank copy of this page, complete and attach.

I/we declare that the information contained in this notification and materials submitted in support is true and correct.
